KOOLSHADE FABRIC & SCREENS ARE FULLY

COOL BUILDINGS

SUSTAINABLE HOMES

USABLE VENUES

HOW DOES KOOLSHADE® WORK?

The micro louvres **stop** the hot solar radiation getting through.

ONLY EXTERNAL SHADING ACHIEVES THIS

Even with temperatures well **in excess of 40°+** no direct solar heat gain will reach the inside of the building. Zero heat gain, reduced glare but with perfect vision out.

**WITH SUMMER SUN,
TOTAL SHADING IS
PROVIDED**

Internal Blinds **allow solar heat** into your room.

KoolShade stops it before it reaches the glazing.

KoolShade Fabrics, Low Sun Angle (LSA) & K17

% Shading *		
Sun Angle	LSA	K17
50°	100%	100%
40°	100%	100%
30°	100%	100%
20°	86%	68%
10°	68%	55%

Internal temperature reduced by over 50%

**6 X BETTER VISION OUT
THAN FABRIC BLINDS***

**LIGHT & AIR PASS THROUGH, KEEPING
ROOMS WELL LIT & COMFORTABLY COOL***

MULTI-FUNCTION FRAMED SOLAR SHADING

KoolShade's® most popular systems are screens. These are made to measure and can be used on **any** building, **any** size and fitted to **any** shape.

T INSTALLATION

Alternating overlapped KoolShade® Solar Screens replicate the existing glazing.

CABLE FIX INSTALLATION

Bespoke 316 Stainless Steel Cable Mounting System with fastener components.

INSTALLATION

KoolShade® Solar Screens fix seamlessly to existing windows & mullions to complement the original glazing.

Pin Hinge Mounting allows for easy window maintenance.

DIRECT FIX INSTALLATION

KoolShade® Solar Screens fix seamlessly to existing windows and mullions to complement the window array.

The Screens fixed to opening lights will not impede the window's function.

KOOLSHADE® METAL FABRIC: THIS IS WHAT WE WEAVE.

First created in the 1940s SmartLouvre Technology has brought this **solar shading technology** into the 21st century. With computerised weaving machines, a range of angular selective* fabrics has been developed to further combat solar heat gain.

K700-17

Fabric Weight: 1.10 kg / m²

Clear open area: 80%

Fabric composition: 90% CuZn15 (C230) commercial bronze and 10% CUSi3Mn1 (C655) silicon bronze

Fabric

Finishes:

Polyester powder coat in any RAL colour (with the ability to create designs on the fabric which are directionally visible)

Fire Safe:

Class A1/A2-s1,d0 in accordance with BS EN 13501-1:2007+A1:2009 BAL & Burning Ember Attack

Resistance to wind:

Hurricane proof: 100mph/160kph

K700-17-LSA

Fabric Weight: 1.35kg / m²

Clear open area: 80%

Fabric composition: 90% CuZn15 (C230) commercial bronze and 10% CUSi3Mn1 (C655) silicon bronze

K700-0-LSA

Vision out ➡

⬅ **Daylight in**

KoolShade® has achieved top Class 4 classification for Thermal Comfort, Daylight Utilisation and Contact with the Outside, with **100% daylight quality Colour Rendering Index (CRI)**.

Fires in residential buildings are becoming increasingly commonplace and more & more regulations are demanding **EN 13501 A1/A2** etc Reaction to Fire/Fire Resistance for external attachments like sun shading devices.

Koolshade is a multi-function, all-in-one shading system. It maximises natural ventilation and daylight and is **fully A1/A2 -s1,d0 to EN 13501 compliant**. **Fire safety: Approved Document B.**

ARE YOU FIRE-SAFE & LEGAL?

The amended guidance for solar shading devices can be summarised as follows:

- External shading devices greater than **4.5 metres above ground** level are included in the definition of a specified attachment.
- Components whose primary function is to provide shade or deflect sunlight must achieve class **A2-s1, d0 or better**.

- Fire-safe
- Non-combustible
- Burning Ember Protection
- Heat Flashover Protection
- Spread of Flame

KOOLSHADE[®]
fire protection

A = Combustibility

'A1/A2': Top Classifications

's' = Smoke & Toxic Gases

's1': Top Classification

'd' = Burning Droplets

'd0' = Top Classification

BAL - FZ - 49.4 Heat Attenuation

BAL - 40 Whole window protection

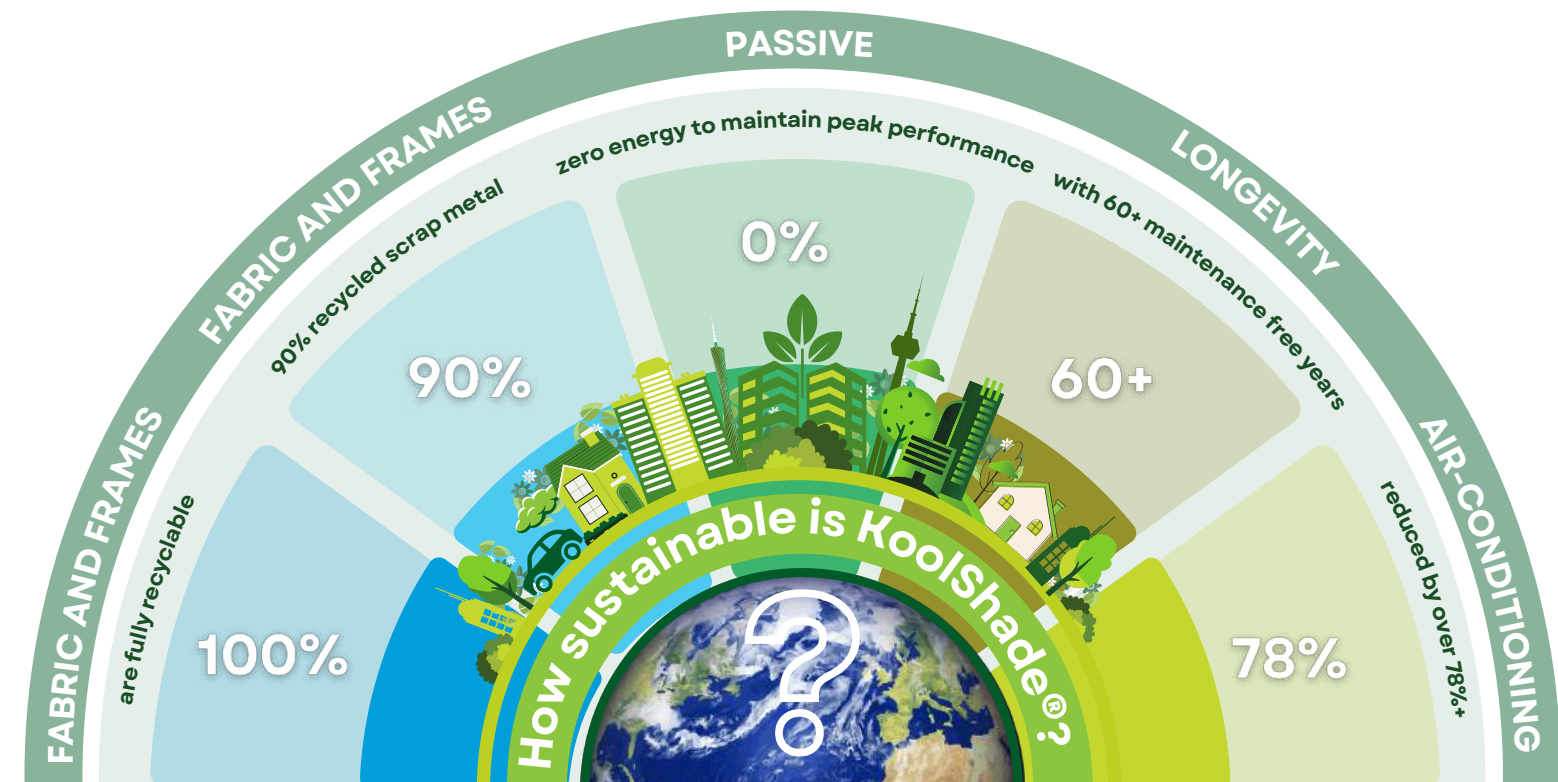

- Made from 90+% recycled material
- Maintenance free
- NO plastic or vinyl

- Over 78% saving in air-con costs
- 100% Recyclable
- 60+ year life span

ABOUT US

Smartlouvre Technology is the sole, global manufacturer of Koolshade® metal fabric, the ultimate in shading from solar heat.

The fabric was invented by two senior research members of Dow Chemical and first manufactured in conjunction with the Borg-Warner Corporation.

Fabric screens were being mass produced for commercial building application across the US, and later throughout the globe by a distributor network.

WE ARE A WEAVER OF A TOTALLY UNIQUE METAL FABRIC USED FOR SOLAR HEAT CONTROL

Under SLTechnology the manufacturing has been brought into the 21st century, by computerising the machines.

Whilst continuing to invest in manufacturing Smartlouvre focused on providing unique apprenticeships and training, supporting our young engineers of the future.

The production volumes have increased and new weaving machines are producing fabric that is being used on the most sustainable buildings in the world.

As our climate changes, there is a fast growing need for PASSIVE ways to reduce temperatures in buildings.

Koolshade® achieves this.

From a VERY smart idea, realised decades ago, to one of the most effective ways to shade our planet from a modern challenge.

Our vision.

Our core business lies in the manufacture of a totally unique, tried and tested high-performance heat blocking and glare reduction shading system that creates better working and living environments for people in commercial, public, and residential buildings, whilst dramatically reducing air-conditioning running and equipment costs.

We, at Smartlouvre, are committed to providing sustainable and innovative solutions that reduce energy consumption, protect the well-being of occupants and maintain superior comfort levels.

Koolshade® provides 100% shade and 100% heat block, saving over 78% of air conditioning costs. It also allows perfect vision and outperforms all other external solar shading systems.

The ideal Passive House shading material.

We serve diverse fields of Solar Shading, Daylighting, Thermal, Visual and Environmental Comfort, Fire Protection, Privacy and Security, Night Sky Pollution, Anti-Glare Lighting, Light Trespass, and even Insect Screening and Bird-Strike Protection.

In short, there is no other product as versatile, or effective, as Koolshade®.
