

## Background:

Having become an emblem of the city, the complex was opened on 7 May 1985 with Victory Boulevard on the eve of the 40th anniversary of the Soviet Union's victory in the Second World War. The park is still a place where fallen heroes are celebrated.

There are imposing statues in various areas of the park which pay tribute to their daring loss, without distinction of age and type, accompanied by sculptures including "Glory to the Heroes", which bring light to the incontrovertible symbol of the communist party: the five-pointed star.

## Outcome:

Victory Park, in the city of Omsk, which is one of the biggest monuments of Eastern Russia and an awe-inspiring war memorial, underwent a recent restoration where a sympathetic change in the lighting theme was vital.

The restoration included an entire technical lighting system revamp in order to give the park new lustre through fundamental lighting, suitable for highlighting the project in its entirety.

helps remove light pollution with its ability to hide the light source

Proceeding down Victory Boulevard, the visual opens up to the “Glory to the Heroes” monument, where Linea Light Group lighting plays a key role in highlighting the imposing sculpture complex. The pondered selection of products with narrow, clear and efficient optics was born out of a desire to create the right lighting to emphasise the entire monument.

Therefore, Archiline\_twin units were also chosen, professional projectors for outdoor use, and four Prolamp units, projectors dedicated to industrial and urban lighting. The latter was supplied in a custom version and enhanced with the addition of directional blades and a beam shaper that allows the excess light to be contained.

What truly sets Victory Park apart is the designer lighting that illuminates the park at night. This stunning work of art is a testament to human creativity and innovation, and it's an experience that you won't want to miss.

As the sun sets over Victory Park, a magical transformation takes place. The designer lighting comes alive, illuminating the surrounding area with a warm and inviting glow. Its unique design creates a mesmerizing display that captivates every visitor.
