

Environmental / Sustainability Policy

The following policy statement applies to our staff, suppliers and couples and guests who enter our venue, as well as the services that we provide.

As a unique wedding and events venue, Tournerbury recognises that our activities have the potential to impact the environment in a number of ways, particularly from:

- Energy
- Water
- Waste
- The goods we buy-in for our events
- Machinery and hardware, we use within Tournerbury Woods Estate
- Fuel for heating and transport
- Office equipment

In recognising this, we are committed to protecting the environment by:

- Reducing energy consumption
- Reducing water usage through rainwater butts
- Reducing, Reusing and Recycling as much as possible
- Supporting local and sustainable suppliers
- Promoting awareness of sustainability with our guests, suppliers and staff
- Purchasing sustainable Office supplies, which can be reused or recycled

This policy and the actions arising from it are regularly reviewed as part of the business planning process.

Sustainable weddings and events – Sustainability is at the heart of everything we do here at Tournerbury. We've made it our mission to help all our couples to be able to create eco conscious weddings in this natural setting.

We do this whilst maintaining, promoting, and championing our core aims of ultra long-term sustainable husbandry and conservation of the Tournerbury Woods Estate to ensure flora and fauna thrives here and that human impacts are carefully managed and minimised.

We regularly work with our professional Ecological Consultants who are all members of The Chartered Institute of Ecology and Environmental Management (CIEEM) in order to promote and facilitate the highest standards of practice for the benefit of nature and society.

We aim to work with suppliers and service providers that have the same mindset and ethos.
