

One Website, One Vision: EHCP and MVP Join Forces Online

Our brand-new website has launched, bringing together the East Hampshire Catchment Partnership (EHCP) and the Meon Valley Partnership (MVP) in one easy-to-use hub. This exciting online space makes it simpler than ever to explore local rivers, wildlife, and water projects across the area.

From the River Hamble to the Lavant Stream, the website showcases the amazing work happening to protect and restore our catchments. Visitors can learn about challenges to our waterscape, the nature-based solutions being implemented, community events, and how to get involved in caring for local waterways.

By combining EHCP and MVP, the site offers a clearer picture of how rivers connect across East Hampshire. It's a celebration of teamwork, shared goals, and the power of partnership.

Whether you're a local resident, landowner, business or nature lover, this new website is your gateway to river-friendly action. Dive in and discover how small changes can make a big splash for our environment.
