

VADOR™

Never miss a visitor or delivery!
Meet the DoorbellCam and Chime.

The DoorbellCam

is a convenient and versatile, outdoor,
wire-free doorbell camera.

It provides main-entrance protection, offering Full-HD video, 130° wide-angle view, motion detection, real-time notifications and a push-to-talk function.

With real-time alerts from the front door straight to your mobile device via the HomeControl2.0 app, you'll always know who's calling.

Whether you're home or away, welcoming visitors and directing deliveries is made easy too, thanks to its inbuilt mic and speaker.

The device is complemented by the battery-powered DoorbellChime, which can sound throughout the property, with up to four able to be connected to the DoorbellCam, promptly alerting you to callers.

Packed with features, the DoorbellCam works for everyone, no matter the property or door. With its wireless design, it offers mess-free installation and doesn't need to be connected to a security system to operate.
