# HomeControl2.0

Extending the capabilities of security with safety control.

Providing security with the next level of smart device application, HomeControl2.0 delivers the ultimate peace of mind, not only is your property secure but with the Personal Help Alarm feature you can also keep your loved ones safe.

Geofence
alerts for easy reminders

Configurable to a distance of 50m to 1000m of the property, you'll receive a push notification reminder via HomeControl2.0 to arm and/or disarm your system as you enter or exit the configured geofence area respectively.
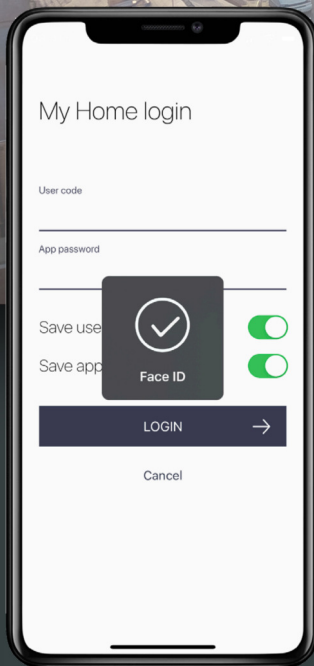

Voice push notifications

Arm and disarm

Great new look and feel

Remote reassurance

Biometric login
## (FaceID/Touch ID (iOS) and Android equivalents)

Logging into the system has never been easier or simpler with biometric login (facial recognition/ fingerprint) available on both iOS and Android. With HomeControl2.0 there's no need to enter your user code every time you open the app.

Simple and intuitive to use

With HomeControl2.0 you can view all zone and sensor status' from one screen, so they're in the right place right away; providing you with the information you need to take action as quickly as possible.
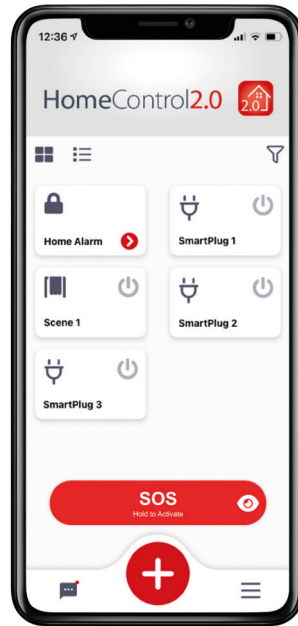

Personal Help Alarm

Protecting your family outside the home

Raise the alarm, fast

Get directions with Google and Apple maps

No continuous tracking

Create and mange your security bbble

Wide range of peripherals

The security system can be tailored to meet your property's exact needs, with external detectors, internal detectors, life safety sensors, outdoor sirens and much more available. With HomeControl2.0 you're controlling the perfect system for your property.
