WHO ARE RESCUE 2

We are a company formed of 3 divisions that complement each other.

Rescue 2 Rescue Division

Rescue 2 Utilities Division

Rescue 2 Training Division

Setting the required gold standard across the industry.

Confined Space Safety and Rescue specialists, Utilities, and Training. We are the leaders in our field, with a measurable performance and consultative approach to our work. Giving that can do attitude, able to scale up with quality and provide that bespoke, necessary rescue, utilities, training, and management provision.

RESCUE DIVISION

Rescue 2 is offering a full range of confined space safety and rescue services across the UK. Rescue 2 is far more than just a confined space rescue stand by team. When your teams are working in confined spaces, we provide the required safe systems you need to avoid foreseen incidents altogether.

Our services give you peace of mind that your employees and contractors are working in the safest possible way when entering confined spaces. Should an emergency situation arise, Rescue 2 will manage and execute the emergency and rescue arrangements.

Rescue 2 covers all aspects of confined space entry with bespoke systems that not only support the basic tripod entries but systems for working in deep shafts, long tunnel traverses, multiple level sewer systems, culverts, reservoirs, boilers and associated systems in Energy recovery and power generation sites. We can advise you and train your employees on aspects of confined space entry safety such as fall arrest, work restraint, work positioning, safe access egress and any bespoke training required.

We can plan for complex or technical entries and rescue scenarios and have the specialists to execute them and get your teams out safely should the need arise. If there are long distances that need to be traversed, we can provide extended duration breathing apparatus rescue teams - or if necessary, we have the people capable of technical rope rescues, a service which is extremely rare.

RESCUE DIVISION

All of our rescue team members hold the following qualifications as a minimum standard:

-  City & Guilds Working in Confined Spaces 6160-03 and Emergency Rescue and Recovery from Confined Spaces 6160-08
-  Rope Rescue Technician
-  Medical skills - Including AED, oxygen/airway and mechanical oxygen respirator management.

Many of the team have further qualifications:

-  Emergency Medical Technician - FREC 3
-  City & Guilds Overseeing Work in Confined Spaces
-  Rope Rescue Supervisor and Instructor
-  USAR Search and Rescue
-  Incident Command
-  Eyebolt Installation and Testing
-  IOSH
-  NEBOSH

Rescue 2 is dedicated to continuous professional development, maintaining a performance-driven quality management system. Our highly qualified team, with top-notch City & Guilds certifications, brings extensive experience from both national and international emergency incidents. Specialising in confined space safety, we offer holistic solutions ensuring contractors' safety from entry to exit.

WHAT SECTORS DO WE WORK IN?

Rescue 2 is a national company who will work for any sector, or company, that has a need for a Rescue team provision in any confined space, or other high risk or potentially dangerous environment.

We work days, nights and weekends and we can also provide 24hr a day cover when required.

Our extensive experience includes working in environments such as:

-  Waste Management Facilities – Energy recovery facilities, material recovery facilities.
-  Utilities: Water industry, power industry and renewable energy construction and engineering industry
-  Food production
-  Ministry of defence
-  Medical support for the media industry

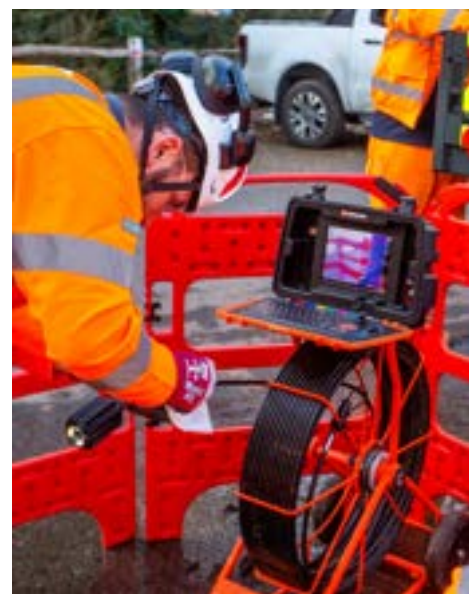

UTILITIES DIVISION

At Rescue 2 we understand the critical role utilities play in sustaining and propelling businesses forward. Our Utilities is dedicated to providing tailored services that improve efficiency and ensure reliability in your utility operations.

Our teams are experienced utilities asset installers and general ground worker operatives being proficiently trained to be able to conduct the following works:

-  CCTV Camera surveys and connectivity surveys
-  Sustainable Drainage Systems (SuDs) and soakaways (water butt surveys and installations, rain-garden planter surveys and installations)
-  Non return valve Wastop and flap installation
-  Jetting and removal via vacuum sucker
-  Sewer and surface water drain cover replacement
-  Gully and Drain Cleaning
-  Tankering of non-hazardous waste
-  Gutter and Drainage repairs
-  Ground Maintenance
-  Project Management

Our Utilities division have proudly managed several large projects including:

-  The installation of sustainable drainage systems (SuDS) in domestic properties and schools.
-  The implementation of thousands of slow-release water butts in domestic properties and industrial premises.
-  The installation of non-return valves in sewers.
-  Maintenance and implementation of drainage systems to commercial property.
-  Carrying out intricate CCTV connectivity surveys of the water networks.

WHY USE RESCUE 2 UTILITIES DIVISION?

Rescue 2 Utilities have a can-do approach offering a premier service at a competitive rate. Your return on investment is key to our success and is what drives us to continue to grow our business and build on our long-term business relationship with you.

Rescue 2 utilities will save our clients valuable time and money by offering a total care package of utilities services offering a smooth end to end process making your job simpler and stress free.

We recognise that each business has unique requirements therefore we offer personalised utility solutions designed to meet your specific needs and challenges.

TRAINING DIVISION

Rescue 2 Limited is a market leader in providing quality health and safety training services across all industries. Our dedicated training support and delivery teams ensure that your professional experience extends from the very first contact through our training, to post course evaluation, development planning and continued support.

We pride ourselves in being a family run business that can deliver services at a corporate level internationally. Our sustainable business model is based on providing the highest quality training - which we ensure is measurable and performance driven at all times - and offering the best service possible, without compromise.

Our training is hard to match. All members of our team are industry professionals, and the majority have worked on the front line in the emergency services. They have served in a variety of specialist units and have developed their extensive knowledge and skills in dealing with real emergency situations.

Whether you are looking for first class emergency service related training, or industry specific safety training, you can be certain of receiving training that is of the highest standard, meeting National Occupational Standards, and supported by a robust quality management system.

CONFINED SPACE TRAINING

We offer comprehensive confined space training for diverse industries, catering to both emergency service professionals and individuals.

Alternatively, we can provide training at your site, using our City & Guilds and CABWI accredited, state of the art Mobile Confined Space & Working at Height Trailer Units. The trailer units are fully equipped with over 30m of tunnelling, 3m vertical entry shaft, CCTV cameras, and with many other benefits and features.

Courses are led by experienced emergency service professionals and industry specialists, offering a holistic approach to confined space working and management. Leveraging the Hear-See-Do (HSD) training model, our programs ensure hands-on practice, meeting National Occupational Standards and providing up-to-date training.

-  Confined Space Entry
-  6160-09 Entrant and Entry Controller for Confined Spaces (Medium Risk)
-  6160-03 High Risk Confined Space
-  6160-02 Medium Risk Confined Space
-  6160-04 Award in Control Entry and Arrangements for Confined Spaces
-  NEW CABWI Level 3 Award in Working in High Risk Confined Spaces (Combined Entrant and Entry Controller)
-  6160-05 Supervising Teams Undertaking Work in Confined Spaces.
-  6160-06 Plan, Manage and Review Legislative and Safety Compliance for Work in Confined Spaces
-  6160-06 Plan, Manage and Review Legislative and Safety Compliance for Work in Confined Spaces

City & Guilds

CABWI
AWARDING BODY

City & Guilds 6160 & CABWI

Rescue 2 are fully accredited to deliver the suite of City & Guilds 6160 Confined Space courses, as well as CABWI Confined Space courses.

TRAINING COURSES

In addition to confined space training, we offer a range of other courses which can be tailored to your specific working environment, industry, risks and people. These courses can be delivered to you directly on site or at one of our bespoke training facilities. These include but are not limited to:

-  IOSH – Working Safely and Managing Safely.
-  Fire Marshal
-  Fire Safety Awareness
-  Abrasive Wheel Training and EUSR Abrasive
-  Wheel Training
-  Manual Handling Training and EUSR Manual
-  Handling Training
-  Rope Rescue Technician/Operator
-  Safety Harness Inspection and Wearer
-  Working at Height Awareness
-  Emergency First Aid at Work
-  First Response Emergency Care (FREC)
-  Face Fit Train the Tester – Qualitative/Quantitative
-  Rescue at Height

Our courses are practical and use the most modern equipment, supporting a valuable learning experience in an interactive environment.

TESTIMONIALS

RESCUE

"Before committing teams into potentially dangerous working environments it is critical to have a suitable rescue provision in place. Rescue 2 provide a service that you can truly be confident in, having used numerous rescue teams in the past, I can honestly say that Rescue2 far exceed the ability of other rescue teams. A good rescue team is built on a solid foundation of experience and knowledge, having met most, if not all of the rescue personnel, it is clear that all of their members bring years of experience and knowledge to the table. This experience and knowledge allows Rescue2's teams to provide dynamic risk assessments and suggest new safer ways of carrying out dangerous work. I would truly recommend Rescue2 to anyone in need of a rescue team."

- Adam Stephens - Morrison Utility Services

UTILITIES

"I thoroughly enjoy working with the team at Rescue2. They committed to our SuDS in Schools project and have delivered an outstanding service, within our deadline. I never have to worry if reports will be uploaded or calls answered, they are always doing the right thing and supporting us. It is also great to get emails from the schools to say how fantastic the teams have been on site. Thank you!"

- Jo - Partnership Delivery Manager, Southern Water

TRAINING

"We have been working with Rescue 2, previously known as Alpha Training Safety Solutions, to deliver specialist Confined Space Training for our employees over the last eight years. Working with Rescue 2 allows us to deliver training directly to our staff at our own sites with their bespoke training vehicles, which saves travelling time and keeps costs low which is important to us as a business.

Over the last eight years Rescue 2 has extended its mobile fleet from 1 to 4 vehicles which has given us further flexibility to deliver training.

Our relationship with Rescue 2 has developed and grown into a strong partnership, and feedback from delegates is always positive. Rescue 2 is effective in what they deliver to us, they are always happy to help and work out solutions for us. The team provide a great all-round job which we, as a Sunday Times Top 30 Best Big Company to work for, value".

- Lorraine - UK Power Network
